

Greenwood Sustainability Plan

Environmental targets to 2030

This document is fictional and exists only to test retrieval, grounded answers, source separation, citations, and refusals.

Targets and reporting

Carbon target

Greenwood will reduce scope-one and scope-two emissions by 46 percent from the 2022 baseline by December 2030.

Electricity

All company-operated offices must use 100 percent renewable electricity by the end of 2027.

Reporting

Progress is reviewed quarterly and published in an annual sustainability report each May.
